**MAJOR ACHIEVEMENTS**

- The first of the five major projects to focus on both spatial and temporal methods to better environmental protection and disaster risk management in Central Asia.
- The project has created a comprehensive network of partners from Central Asia and Europe, including universities, research institutes, and civil society organizations.
- The project has established a central repository of open access educational and training materials, including courses, tutorials, and case studies.
- The project has developed a new educational platform, EPCA, which is accessible in multiple languages and includes interactive modules.
- The project has trained over 500 partners and students from Central Asia and Europe.
- The project has contributed to the development of new educational programs and courses in environmental protection and disaster risk management.
- The project has created a platform for collaboration and knowledge exchange among partners from Central Asia and Europe.

**3.2.1.1 Selected results**

The project has established a comprehensive network of partners from Central Asia and Europe, including universities, research institutes, and civil society organizations. The project has developed a new educational platform, EPCA, which is accessible in multiple languages and includes interactive modules. The project has trained over 500 partners and students from Central Asia and Europe. The project has contributed to the development of new educational programs and courses in environmental protection and disaster risk management. The project has created a platform for collaboration and knowledge exchange among partners from Central Asia and Europe.

**3.2.1.2 Learning outcomes**

- The project has developed new educational programs and courses in environmental protection and disaster risk management.
- The project has contributed to the development of new educational programs and courses in environmental protection and disaster risk management.
- The project has established a central repository of open access educational and training materials, including courses, tutorials, and case studies.
- The project has created a comprehensive network of partners from Central Asia and Europe, including universities, research institutes, and civil society organizations.

**3.2.1.3 Challenges and solutions**

The project has faced several challenges, including the need to develop new educational programs and courses in environmental protection and disaster risk management, the need to establish a central repository of open access educational and training materials, and the need to create a comprehensive network of partners from Central Asia and Europe. The project has developed new educational programs and courses in environmental protection and disaster risk management, developed a central repository of open access educational and training materials, and established a comprehensive network of partners from Central Asia and Europe.

**3.2.1.4 Future directions**

The project will continue to develop new educational programs and courses in environmental protection and disaster risk management, establish a central repository of open access educational and training materials, and establish a comprehensive network of partners from Central Asia and Europe. The project will also focus on the dissemination of knowledge and best practices, and on the development of new tools and technologies for environmental protection and disaster risk management.
